

LAZIZAL[®]

ADVANCED FACE LIFT SERUM

HOW TO USE THE LAZIZAL[®] SERUM?

Serum - due to the richness of nutrients - should be used as first, before the cream.

HOW TO APPLY SERUM

Before using the product for the first time, turn the bottom of the syringe from closed to open.

Apply, avoiding the eye area. After applying, wait until the serum is completely absorbed (approx. 15 minutes). If a white coating forms on the skin after applying the serum (effect of using too much preparation), wash it off with a soaked cotton pad.

1 | Shake before use.

2 | Take a small amount (0,2-1 ml) of the product on your hand.

3 | Apply evenly over the face.

4 | After application, limit facial expressions until complete absorption of the preparation (up to 30 seconds).

5 | Wait 10-15 minutes before applying make-up.

If too much serum is applied, white residues may appear on the skin. Excess product should be removed with a wet cotton pad. After application, limit facial expressions until complete absorption of the preparation. Fanning speeds up the absorption process. Wait 10-15 minutes before applying makeup. It is recommended to use powder make-up products.
