

Diet for 7 days

For your DuoLife Sugar Metabolism Set

ADDITIONAL NOTES:

Estimated amount of calories per day: 1500 kcal (A diet should be modified according to individual calorie needs, taking into account the amount of proteins, fats and carbohydrates).

Food products that support the function of the body are crucial in this proposed diet.

The menu includes a table listing the products used in this diet and their calories content. It will help you control your calories intake by modifying your meals depending on your calorie needs, which is unique in each person.

*The proposed diet is a pattern of eating tailored for the DUOLIFE SUGAR METABOLISM Set and shall not be perceived as medical advice for any person following it.

It is recommended to follow the diet for at least 3 months.

PREPARED BY:

Nikodem Finke and Małgorzata Dobrzyńska (Personal trainer and clinical nutritionist)

Email: kontakt@9rings.pl

BIOLOGICAL CLOCK SUGAR METABOLISM:

08:00 – 25 ml DuoLife Day, before the meal

08:30 – 2 capsules of DuoLife Medical Formula ProSugar® NEW and 20 ml DuoLife Chlorofil

10:00 – 2 capsules of DuoLife Medical Formula ProDeacid® NEW

14:00 – 5 ml DuoLife RegenOil Liquid Gold® and 2 capsules of DuoLife Medical Formula ProSelect® NEW

19:00 – 25 ml DuoLife Night, before the meal*

*Use the product before the last meal. 7 p.m. is provided as an indicative time of the last meal.
